

Home Learning – Year 5 – Spring 1 Week 3 and 4

Who were the Anglo-Saxons?

What was Anglo-Saxon Life like?

Explore the same [BBC website](#) on the Anglo-Saxons to find out about life in Anglo-Saxon times.

Create a leaflet or poster to explain some facts related to Anglo-Saxon life.

Did the Anglo Saxons have famous legends?

If we had been in school we would have been reading a story based on the Anglo-Saxon legend Beowulf! Complete **one** version of the [reading comprehension](#) on Beowulf and answer the following questions. This is a worksheet which should be attached below.

If you like, you could draw your own 'Grendel' monster!

Can you feel the force?

What is water resistance? Water resistance experiment!

We absolutely loved this investigation last year! Please check with your parents first that you are allowed to do this! You will need some foil (preferably a few pieces cut to A4 size. That way we could compare our experiments!) Create a boat to hold some small plastic toys. Last year we used Lego figures and small weights!

If you can make a few boats you will be able to investigate which types of boats can hold more weight.

There is a slight clue in the title in that you may start to notice how water resistance affects the boat. If you could get some photos of the experiment,

that would be great!

Can you name and label different types of forces?

Explore forces in action by using the [Powerpoint Presentation](#) on balanced and unbalanced forces. Use the [Forces Quiz PowerPoint](#) as well to explore forces and their effects on objects.

Complete the [Activity Sheet](#) on 'forces in action'
