

Home work / Isolation – Year 5 – Summer 2

Science – How do we change as we grow? Why do I need to be healthy?

Science – What can you now do that you couldn't do when you were a baby?

Have you got a photo of you as a baby and one of you now? Can you create a list of things you could do as a baby and a list of things that you can now do as a child. This

would look good in a small leaflet or book so that the pictures and two lists can be compared!

Science – Why is a healthy breakfast so important?

Watch the clip (linked below) from BBC Teach called How does breakfast affect your day?

<https://www.bbc.co.uk/teach/class-clips-video/science-ks2-digestion-how-breakfast-affects-your-day/zk7rkmn>

Now create a poster that describes what the best breakfast before going to school would be like.

Science / Art – What have you, if anything, inherited from your parents?

Watch the clip (linked below) from BBC Teach called How the human body grows.

<https://www.bbc.co.uk/teach/class-clips-video/science-ks2-how-the-human-body-grows/zd7rkmn>

Draw a picture / portrait of yourself and identify your eye colour, skin colour and some of your other features. Now draw a picture of someone in your family e.g. your mother or your father. Have you inherited any features from them? Describe some of them.

PSHE – Who are your heroes?

Who do you look up to and want to be like? Why?

Record this in any way you like. A poster perhaps or a small booklet. Perhaps a decorated paper plate?

What is it about the person that you admire? Why do you want to be like them?
